MAURIZIO LAMANNA

SENIOR EXPERIENCE DESIGNER

Sydney, Australia · maurizio.lamanna@mantelgroup.com.au · linkedin.com/in/maurizio-lamanna

PROFILE

Sydney-based architect turned experience designer. Architecture taught me to think in systems (how people move through a space, where friction lives, and how structure shapes behaviour), and I bring that same spatial logic to digital products. I specialise in the messy front end of a problem: distilling complex, technical, many-stakeholdered challenges into refined, playful, human-focused experiences. At Mantel I lead design on discovery and delivery engagements for clients including VicRoads, ANZ, Toll Group, Medibank, nib and Nine's Drive.com.au, from experience mapping and user research through to high-fidelity prototypes and build-ready handover.

EXPERIENCE

MANTEL: Senior Experience Designer
Sydney · July 2022 – present

Design lead on discovery and delivery engagements across government, banking, health, logistics and media. I turn complex technical problems into experiences people love, then hand them over so build teams can hit the ground running.

- **VicRoads: Vehicle Transfer Service (2026):** led design on a 10-week discovery for a vehicle transfer service with escrow-backed payments. Mapped the full buyer/seller journey, designed golden paths and error states, and co-built a React Native demo, de-risking a multi-million dollar build decision with 5 epics of build-ready documentation.
- **VicRoads: Learner Permit & Hazard Perception Test (2025–26):** project lead on an 8-week discovery reimagining how Victorians learn to drive: mobile-first with an AI learning companion (“Ask Lara”). Recommended an open-source hybrid platform giving VicRoads full IP ownership and a white-label play for other jurisdictions.
- **ANZ: Digital Expo on Apple Vision Pro (2025):** designed one of Australia's first banking experiences in spatial computing: an interactive institutional expo showcased at SIBOS, making ANZ first to POC the technology and saving up to $200K per physical event.
- **Toll Group: MoveMaestro Future Vision (2025):** created the target-state vision and service design for Toll's relocation platform (ADF, Home Affairs, corporate): vision map, service/journey maps and hi-fi prototype that aligned stakeholders and de-risked its commercial future.
- **Alfred Health: ML for Blood Transfusion Prediction (2024):** defined the problem, mapped the user journey, facilitated ideation and delivered high-fidelity prototypes that helped secure future funding.
- **Safety Sphere: Vision Pro demo (2024):** internal capability uplift; storyboarded and designed hi-fi visionOS screens and collaborated with engineering on a working demo.
- **Medibank: Preventative Health App (2024):** designed, prototyped and animated a “service manual for your body” journey to a booked GP appointment; presented company-wide to win stakeholder buy-in.
- **Stringline: Trades App UX/UI Redesign (2024):** rebuilt flows with the founder and developer for MVP launch: 30+ flows reimagined, 100+ screens, 5 rounds of user testing.
- **nib: Continuous Cyber Assurance (2023):** research, journey maps, personas and a story-mapped feature backlog for a data-backed cyber dashboard now used to brief executives.
- **Drive.com.au: Marketplace Discovery (2023):** planned and coached agile design sprints with Nine's product team; two rounds of moderated research and two responsive hi-fi prototypes for the marketplace roadmap.
- **Belong: North Star Discovery (2022–23):** experience principles, a validated Vision Experience Map and tested concepts for the order-to-activate journey, setting the foundation for delivery.

MANTEL: Trainee Designer
Sydney · April – July 2022

Completed Mantel's design traineeship, applying the full discovery process to an internal service design project: user research, ideation, prototyping and delivery of a notification tool that streamlined COVID case communication across Mantel hubs.

EDUCATION

2021	**GENERAL ASSEMBLY** *UX Design Intensive*
2019	**THE UNIVERSITY OF SYDNEY** *Master of Architecture*
2014	**THE UNIVERSITY OF SYDNEY** *Bachelor of Design (Architecture)*

CAPABILITIES

DESIGN	Experience mapping · journey mapping · service design · UX/UI · accessibility · spatial computing (visionOS)
RESEARCH	User interviews · survey design · usability testing · synthesis · personas · human-centred design
DELIVERY	High-fidelity prototyping (Figma) · design sprints · workshop facilitation · stakeholder management · design strategy
