MAURIZIO LAMANNA

SENIOR EXPERIENCE DESIGNER

Sydney, Australia · maurizio.lamanna@mantelgroup.com.au · linkedin.com/in/maurizio-lamanna

PROFILE

Experience designer in Sydney, trained as an architect. Architecture taught me to look at how people move through a space, where they get stuck, and how the structure around them changes what they do, and I use the same thinking on digital products. I do my best work at the start of a project, when the problem is technical and lots of people have a stake in it. At Mantel I lead design on discovery and delivery projects for clients including VicRoads, ANZ, Toll Group, Medibank, nib and Nine's Drive.com.au, from experience mapping and user research to high-fidelity prototypes and handover to the build team.

EXPERIENCE

MANTEL — Senior Experience Designer
Sydney · July 2022 – present

Design lead on discovery and delivery projects in government, banking, health, logistics and media, from early research through to handover to build teams.

- **VicRoads — Vehicle Transfer Service (2026):** led design on a 10-week discovery for a vehicle transfer service with escrow-backed payments. Mapped the buyer and seller journeys, designed the main paths and error states, worked on a React Native demo, and wrote 5 build-ready epics to support a multi-million dollar build decision.
- **VicRoads — Learner Permit & Hazard Perception Test (2025–26):** project lead on an 8-week discovery into how Victorians learn to drive. Designed a mobile-first test with an AI study companion (“Ask Lara”), and recommended an open-source hybrid platform that gives VicRoads full IP ownership and could be white-labelled for other states.
- **ANZ — Digital Expo on Apple Vision Pro (2025):** designed an interactive expo for Apple Vision Pro, one of the first banking experiences on it in Australia. Shown at SIBOS, it made ANZ the first bank to complete a proof of concept on the headset, with estimated savings of up to $200K per physical event.
- **Toll Group — MoveMaestro Future Vision (2025):** created the target-state vision and service design for Toll's relocation platform (ADF, Home Affairs, corporate): a vision map, service and journey maps, and a hi-fi prototype that got stakeholders behind one direction.
- **Alfred Health — ML for Blood Transfusion Prediction (2024):** defined the problem, mapped the user journey, facilitated ideation and delivered high-fidelity prototypes that helped secure future funding.
- **Safety Sphere — Vision Pro demo (2024):** Mantel's first Vision Pro project. Storyboarded the experience, designed hi-fi visionOS screens and worked with the developers on a working demo.
- **Medibank — Preventative Health App (2024):** designed, prototyped and animated a “service manual for your body” journey to a booked GP appointment, and presented it company-wide to get stakeholders on board.
- **Stringline — Trades App UX/UI Redesign (2024):** rebuilt the app's flows with the founder and developer before the MVP launch: 30+ flows, 100+ screens, 5 rounds of user testing.
- **nib — Continuous Cyber Assurance (2023):** research, journey maps, personas and a story-mapped feature backlog for a data-backed cyber dashboard now used to brief executives.
- **Drive.com.au — Marketplace Discovery (2023):** planned and coached agile design sprints with Nine's product team; two rounds of moderated research and two responsive hi-fi prototypes for the marketplace roadmap.
- **Belong — North Star Discovery (2022–23):** experience principles, a Vision Experience Map and tested concepts for the order-to-activate journey, including designs for the first eSIM release.

MANTEL — Trainee Designer
Sydney · April – July 2022

Completed Mantel's design traineeship. For my project I took an internal service through a full discovery, from research to delivery: a notification tool that made it simpler to tell Mantel's offices about COVID cases.

EDUCATION

2021	**GENERAL ASSEMBLY** *UX Design Intensive*
2019	**THE UNIVERSITY OF SYDNEY** *Master of Architecture*
2014	**THE UNIVERSITY OF SYDNEY** *Bachelor of Design (Architecture)*

CAPABILITIES

DESIGN	Experience mapping · journey mapping · service design · UX/UI · accessibility · spatial computing (visionOS)
RESEARCH	User interviews · survey design · usability testing · synthesis · personas · human-centred design
DELIVERY	High-fidelity prototyping (Figma) · design sprints · workshop facilitation · stakeholder management · design strategy
